DAUGHTER OF THE CENTAURS CENTAURIAD #1 by Kate Klimo

Jan 24, 2012. When I first heard about Daughter of the Centaurs I got super excited about it. I am going through this Mythology phase and was really looking forward to reading it. I have always been a fan of fantasy novels and I have a soft spot for mythology.

The book is set in a future world where humans have been forced to live on the plains due to the extinction of all other living beings. The story follows Malora, a young girl who is the last human left on Earth. She is a horse wrangler and a hunter, just like her father. But when her people are massacred by batlike monsters called Leatherwings, Malora takes it upon herself to hunt them down.

I thought the concept was exciting and different and I enjoyed the book. It was a great read and I would definitely recommend it to anyone who enjoys fantasy and mythology. I rate it 4 stars.
